

## STATEMENT

We are mad and the longer we live we see more of the disconnection, rejection, discrimination, inertia, poverty, suffering and injustice. But we exist and move forward through our art and the opportunity to share our music. We do not profess to be anything more than a band that makes noise.

We play noise from our heart and soul. We record in an insulated garage, but we let loose until our wrists and elbows are sore and our ears are ringing.

When we first created the band in 2021, we improvised for 2 or 3 hours every day during COVID. We taught ourselves how to play our music. No one directed us. It was organic and amazing.
